DETAILED ACTION

Response to Amendment

This final Office action is in response to the amendment filed 12/13/04 which canceled claims 1-46 and added new claims 47-83. All objections not repeated below are withdrawn. Claims 47-83 are pending.

Claim Objections

Claim 81 is objected to because of the following informalities: it depends from claim 63. The pattern of claim dependency in other claims indicates that Applicant may have intended claim 81 to depend from claim 67. If so, appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 47-83 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-46 of U.S. Patent No. 6,732,222. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are directed to a device which performs the method of the patent claims. The public is served by requiring a terminal disclaimer to forever link the two cases and disclaim any additional term resulting from the patenting of the instant application.
